AIDCF

AI Data Centre Facilities Assurance Framework

ASSESSMENT METHODOLOGY ENHANCED PRACTITIONER HANDBOOK

Version 1.1

Decision trees • 360 control-level procedures • 15 inspection checklists • evidence playbooks • CG-01 to CG-15 workbooks • synthetic completed examples • assessor competence/accreditation • AITG ingestion mappings

Artifact ID: AIDCF-AM-001
Basis: Existing AIDCF-009 Practitioner Handbook v1.0 only
Author: Siva Sethumadhavan
Status: Draft for controlled review

Document control

Field	Value
Source boundary	Only the structure, concepts, domains, families, controls, evidence references, gates, roles, methods and workpaper patterns already present in AIDCF-009 v1.0.
Control universe	15 domains, 90 families and 360 controls.
Change	Additive enhancement; v1.0 doctrine and lifecycle are preserved.
Enhancements	Decision trees; individual procedures; inspection; evidence; gates; examples; competency/accreditation; AITG ingestion.
Safety	No hazardous or disruptive testing without explicit authority and competent engineering governance.
Assurance	UNKNOWN remains visible; gates are non-compensating; automation cannot approve material decisions.

Preserved lifecycle

Initiate → Profile → Scope → Tailor → Plan → Collect → Validate → Assess → Analyse → Gate → Find → Review → Decide → Report → Reassess

Part I - Detailed assessor decision trees

DT-01 Assessment acceptance

Decision question explicit and authorised?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Decision question explicit and authorised?	Evidence and rationale.
3	No: rework/stop. Yes: capability check.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-02 Capability definition

Capability, owner and outcomes defined?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Capability, owner and outcomes defined?	Evidence and rationale.
3	No: CG-01 UNKNOWN. Yes: boundary.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-03 Boundary completeness

All material boundaries and exclusions approved?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	All material boundaries and exclusions approved?	Evidence and rationale.
3	No: CG-02 UNKNOWN. Yes: dependencies.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-04 Applicability

Material to capability, outcome, dependency or state?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Material to capability, outcome, dependency or state?	Evidence and rationale.
3	Yes: apply. No: approve N/A rationale.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-05 Evidence acceptance

Source, scope, time, integrity and review adequate?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Source, scope, time, integrity and review adequate?	Evidence and rationale.
3	No: reject/restrict/UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-06 Evidence freshness

Represents current baseline and state?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Represents current baseline and state?	Evidence and rationale.
3	No: stale; request current evidence.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-07 Evidence conflict

Material evidence supports incompatible assertions?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Material evidence supports incompatible assertions?	Evidence and rationale.
3	Preserve both; investigate; unresolved = UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-08 Sampling

Exception or population defect found?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Exception or population defect found?	Evidence and rationale.
3	Expand by risk/strata; unreliable frame = UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-09 Interview

Material claim corroborated?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Material claim corroborated?	Evidence and rationale.
3	No: contextual evidence only.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-10 Site safety

Induction, route, permits and stop authority ready?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Induction, route, permits and stop authority ready?	Evidence and rationale.
3	No/unsafe: STOP.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-11 Testing

Authority, initial state, method, instruments, abort and rollback ready?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Authority, initial state, method, instruments, abort and rollback ready?	Evidence and rationale.
3	No: do not test.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-12 Control result

Evidence meets criterion at target assurance level?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Evidence meets criterion at target assurance level?	Evidence and rationale.
3	Yes: bounded positive. No: partial/adverse/UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-13 Failure path

Path segments and dependencies evidenced?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Path segments and dependencies evidenced?	Evidence and rationale.
3	No: candidate path/UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-14 Gate applicability

Gate material to capability/outcome?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Gate material to capability/outcome?	Evidence and rationale.
3	Yes: apply profile. No: approved N/A.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-15 Gate status

Criterion and evidence floor satisfied?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Criterion and evidence floor satisfied?	Evidence and rationale.
3	Pass; demonstrated unmet = Fail; insufficient = UNKNOWN.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-16 Finding

Evidenced variance from criterion?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Evidenced variance from criterion?	Evidence and rationale.
3	Yes: finding and gate review.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-17 Critical UNKNOWN

Could unknown defeat outcome or gate?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Could unknown defeat outcome or gate?	Evidence and rationale.
3	Yes: ceiling/suspension.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-18 Independent review

Decision traceable to evidence, findings and gates?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Decision traceable to evidence, findings and gates?	Evidence and rationale.
3	No: return.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-19 Assurance decision

Gates, evidence, limitations and review complete?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Gates, evidence, limitations and review complete?	Evidence and rationale.
3	No: limit, adverse, unknown or withhold.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

DT-20 Reassessment

Material change, incident, expiry or outcome change?

Node	Decision/action	Record
1	Identify subject, scope and decision question.	Tree instance ID.
2	Material change, incident, expiry or outcome change?	Evidence and rationale.
3	Yes: suspend affected claim; delta/full reassessment.	Selected branch.
4	Evaluate UNKNOWN, critical gate and assurance ceiling.	Linked records.
5	Obtain technical/independent review where material.	Reviewer decision.
6	Terminate in Proceed, Rework, Escalate, UNKNOWN, Stop or Decision Review.	Outcome and version.

- Retain contrary evidence.
- Tree aids professional judgment; it does not approve decisions autonomously.

Part II - Full control-level procedures for all 360 controls

Every control position already present in AIDCF-009 is expanded below. IDs remain MCF-[DOMAIN]-001 to 024 in each domain.

GOV - Governance, Accountability and Assurance Direction

Primary gates: CG-13; CG-14. Baseline evidence: charters, roles, policies, minutes and reviews.

GOV-01 Governance architecture

MCF-GOV-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether governance architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether governance architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether governance architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether governance architecture supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

GOV-02 Accountability and responsibility

MCF-GOV-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether accountability and responsibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether accountability and responsibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether accountability and responsibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether accountability and responsibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

GOV-03 Policy and standards management

MCF-GOV-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether policy and standards management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether policy and standards management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether policy and standards management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether policy and standards management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

GOV-04 Risk and assurance governance

MCF-GOV-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether risk and assurance governance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether risk and assurance governance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether risk and assurance governance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether risk and assurance governance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

GOV-05 Stakeholder and regulatory interface

MCF-GOV-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether stakeholder and regulatory interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether stakeholder and regulatory interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether stakeholder and regulatory interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether stakeholder and regulatory interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

GOV-06 Ethics, impartiality and competence

MCF-GOV-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether ethics, impartiality and competence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether ethics, impartiality and competence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether ethics, impartiality and competence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

MCF-GOV-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether ethics, impartiality and competence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request charters, roles, policies, minutes and reviews; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-13; CG-14; obtain review and set reassessment trigger.

CAP - AI Capability, Service Outcome and Demand Management

Primary gates: CG-01; CG-02. Baseline evidence: capability, outcomes, demand, tolerances and architecture.

CAP-01 Capability inventory

MCF-CAP-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether capability inventory supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether capability inventory supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether capability inventory supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether capability inventory supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

CAP-02 Service outcome definition

MCF-CAP-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether service outcome definition supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether service outcome definition supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether service outcome definition supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether service outcome definition supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

CAP-03 Criticality and materiality

MCF-CAP-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether criticality and materiality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether criticality and materiality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether criticality and materiality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether criticality and materiality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

CAP-04 Demand and growth modelling

MCF-CAP-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether demand and growth modelling supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether demand and growth modelling supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether demand and growth modelling supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether demand and growth modelling supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

CAP-05 Operating envelope

MCF-CAP-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether operating envelope supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether operating envelope supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether operating envelope supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether operating envelope supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

CAP-06 Capability lifecycle and change

MCF-CAP-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether capability lifecycle and change supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether capability lifecycle and change supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether capability lifecycle and change supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

MCF-CAP-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether capability lifecycle and change supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request capability, outcomes, demand, tolerances and architecture; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-01; CG-02; obtain review and set reassessment trigger.

DEP - Dependency, Concentration and External Reliance Management

Primary gates: CG-03; CG-12. Baseline evidence: dependency graphs, contracts, routes and provider evidence.

DEP-01 Dependency discovery

MCF-DEP-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether dependency discovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether dependency discovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether dependency discovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether dependency discovery supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

DEP-02 Shared and common-mode dependencies

MCF-DEP-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether shared and common-mode dependencies supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether shared and common-mode dependencies supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether shared and common-mode dependencies supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether shared and common-mode dependencies supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

DEP-03 External providers and utilities

MCF-DEP-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether external providers and utilities supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether external providers and utilities supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether external providers and utilities supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether external providers and utilities supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

DEP-04 Concentration and substitutability

MCF-DEP-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether concentration and substitutability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether concentration and substitutability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether concentration and substitutability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether concentration and substitutability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

DEP-05 Boundary and interface control

MCF-DEP-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether boundary and interface control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether boundary and interface control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether boundary and interface control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether boundary and interface control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

DEP-06 Dependency monitoring and review

MCF-DEP-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether dependency monitoring and review supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether dependency monitoring and review supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether dependency monitoring and review supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

MCF-DEP-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether dependency monitoring and review supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request dependency graphs, contracts, routes and provider evidence; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-12; obtain review and set reassessment trigger.

PHY - Physical Site, Building and Security Infrastructure

Primary gates: CG-02; CG-04. Baseline evidence: site studies, drawings, inspections, access and life-safety records.

PHY-01 Site and location resilience

MCF-PHY-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether site and location resilience supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether site and location resilience supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether site and location resilience supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether site and location resilience supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

PHY-02 Building and structural integrity

MCF-PHY-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether building and structural integrity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether building and structural integrity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether building and structural integrity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether building and structural integrity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

PHY-03 Physical zoning and segregation

MCF-PHY-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether physical zoning and segregation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether physical zoning and segregation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether physical zoning and segregation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether physical zoning and segregation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

PHY-04 Access and surveillance

MCF-PHY-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether access and surveillance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether access and surveillance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether access and surveillance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether access and surveillance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

PHY-05 Asset movement and custody

MCF-PHY-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether asset movement and custody supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether asset movement and custody supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether asset movement and custody supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether asset movement and custody supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

PHY-06 Fire, life safety and emergency interfaces

MCF-PHY-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether fire, life safety and emergency interfaces supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether fire, life safety and emergency interfaces supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether fire, life safety and emergency interfaces supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-PHY-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether fire, life safety and emergency interfaces supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request site studies, drawings, inspections, access and life-safety records; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

POW - Electrical Power Infrastructure and Energy Continuity

Primary gates: CG-05. Baseline evidence: SLD, studies, settings, telemetry, maintenance and tests.

POW-01 Utility and grid interface

MCF-POW-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether utility and grid interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether utility and grid interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether utility and grid interface supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether utility and grid interface supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

POW-02 Generation and fuel

MCF-POW-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether generation and fuel supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether generation and fuel supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether generation and fuel supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether generation and fuel supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

POW-03 UPS and energy storage

MCF-POW-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether ups and energy storage supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether ups and energy storage supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether ups and energy storage supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether ups and energy storage supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

POW-04 Distribution and protection

MCF-POW-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether distribution and protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether distribution and protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether distribution and protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether distribution and protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

POW-05 Power quality and transient response

MCF-POW-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether power quality and transient response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether power quality and transient response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether power quality and transient response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether power quality and transient response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

POW-06 Electrical monitoring, maintenance and recovery

MCF-POW-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether electrical monitoring, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether electrical monitoring, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether electrical monitoring, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

MCF-POW-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether electrical monitoring, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request SLD, studies, settings, telemetry, maintenance and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-05; obtain review and set reassessment trigger.

THM - Cooling, Thermal and Fluid Infrastructure

Primary gates: CG-06. Baseline evidence: P&ID, models, controls, telemetry, fluids and tests.

THM-01 Thermal architecture and capacity

MCF-THM-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether thermal architecture and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether thermal architecture and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether thermal architecture and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether thermal architecture and capacity supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

THM-02 Air cooling systems

MCF-THM-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether air cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether air cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether air cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether air cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

THM-03 Liquid cooling systems

MCF-THM-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether liquid cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether liquid cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether liquid cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether liquid cooling systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

THM-04 Heat rejection and water systems

MCF-THM-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether heat rejection and water systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether heat rejection and water systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether heat rejection and water systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether heat rejection and water systems supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

THM-05 Fluid quality and leak management

MCF-THM-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether fluid quality and leak management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether fluid quality and leak management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether fluid quality and leak management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether fluid quality and leak management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

THM-06 Thermal control, maintenance and recovery

MCF-THM-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether thermal control, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether thermal control, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether thermal control, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

MCF-THM-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether thermal control, maintenance and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request P&ID, models, controls, telemetry, fluids and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-06; obtain review and set reassessment trigger.

ENV - Environmental and Resource Performance

Primary gates: CG-02; CG-04. Baseline evidence: environmental telemetry, meters, permits and calculations.

ENV-01 Environmental operating conditions

MCF-ENV-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether environmental operating conditions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether environmental operating conditions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether environmental operating conditions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether environmental operating conditions supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

ENV-02 Energy performance

MCF-ENV-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether energy performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether energy performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether energy performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether energy performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

ENV-03 Water performance

MCF-ENV-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether water performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether water performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether water performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether water performance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

ENV-04 Carbon and resource reporting

MCF-ENV-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether carbon and resource reporting supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether carbon and resource reporting supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether carbon and resource reporting supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether carbon and resource reporting supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

ENV-05 Hazardous materials and waste

MCF-ENV-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether hazardous materials and waste supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether hazardous materials and waste supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether hazardous materials and waste supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether hazardous materials and waste supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

ENV-06 Climate adaptation and resource continuity

MCF-ENV-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether climate adaptation and resource continuity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether climate adaptation and resource continuity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether climate adaptation and resource continuity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

MCF-ENV-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether climate adaptation and resource continuity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request environmental telemetry, meters, permits and calculations; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-02; CG-04; obtain review and set reassessment trigger.

CMP - AI Compute Infrastructure

Primary gates: CG-08. Baseline evidence: topology, firmware, configuration, telemetry and tests.

CMP-01 Compute architecture and configuration

MCF-CMP-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether compute architecture and configuration supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether compute architecture and configuration supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether compute architecture and configuration supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether compute architecture and configuration supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

CMP-02 Cluster and scale-up domains

MCF-CMP-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether cluster and scale-up domains supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether cluster and scale-up domains supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether cluster and scale-up domains supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether cluster and scale-up domains supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

CMP-03 Capacity, scheduling and utilisation

MCF-CMP-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether capacity, scheduling and utilisation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether capacity, scheduling and utilisation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether capacity, scheduling and utilisation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether capacity, scheduling and utilisation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

CMP-04 Firmware, driver and compatibility

MCF-CMP-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether firmware, driver and compatibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether firmware, driver and compatibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether firmware, driver and compatibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether firmware, driver and compatibility supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

CMP-05 Compute health and observability

MCF-CMP-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether compute health and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether compute health and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether compute health and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether compute health and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

CMP-06 Compute lifecycle and recovery

MCF-CMP-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether compute lifecycle and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether compute lifecycle and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether compute lifecycle and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-CMP-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether compute lifecycle and recovery supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, firmware, configuration, telemetry and tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

STO - AI Storage and Data Infrastructure

Primary gates: CG-08; CG-10. Baseline evidence: architecture, integrity, performance, replication and recovery tests.

STO-01 Storage architecture and tiering

MCF-STO-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether storage architecture and tiering supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether storage architecture and tiering supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether storage architecture and tiering supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether storage architecture and tiering supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

STO-02 Performance and capacity

MCF-STO-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether performance and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether performance and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether performance and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether performance and capacity supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

STO-03 Integrity and consistency

MCF-STO-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether integrity and consistency supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether integrity and consistency supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether integrity and consistency supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether integrity and consistency supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

STO-04 Protection and replication

MCF-STO-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether protection and replication supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether protection and replication supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether protection and replication supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether protection and replication supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

STO-05 Checkpoint and recovery services

MCF-STO-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether checkpoint and recovery services supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether checkpoint and recovery services supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether checkpoint and recovery services supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether checkpoint and recovery services supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

STO-06 Storage monitoring and lifecycle

MCF-STO-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether storage monitoring and lifecycle supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether storage monitoring and lifecycle supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether storage monitoring and lifecycle supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

MCF-STO-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether storage monitoring and lifecycle supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request architecture, integrity, performance, replication and recovery tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; CG-10; obtain review and set reassessment trigger.

NET - AI Network and Interconnect Architecture

Primary gates: CG-08. Baseline evidence: topology, cabling, configuration, telemetry and failover tests.

NET-01 Scale-up and scale-out fabrics

MCF-NET-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether scale-up and scale-out fabrics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether scale-up and scale-out fabrics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether scale-up and scale-out fabrics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether scale-up and scale-out fabrics supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

NET-02 Performance and congestion control

MCF-NET-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether performance and congestion control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether performance and congestion control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether performance and congestion control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether performance and congestion control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

NET-03 Storage and service networks

MCF-NET-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether storage and service networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether storage and service networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether storage and service networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether storage and service networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

NET-04 Management and out-of-band networks

MCF-NET-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether management and out-of-band networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether management and out-of-band networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether management and out-of-band networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether management and out-of-band networks supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

NET-05 Physical connectivity and optics

MCF-NET-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether physical connectivity and optics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether physical connectivity and optics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether physical connectivity and optics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether physical connectivity and optics supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

NET-06 Network control and observability

MCF-NET-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether network control and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether network control and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether network control and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

MCF-NET-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether network control and observability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request topology, cabling, configuration, telemetry and failover tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-08; obtain review and set reassessment trigger.

OPS - Building Operations and Service Management

Primary gates: CG-07; CG-13; CG-14. Baseline evidence: procedures, work orders, alarms, incidents and changes.

OPS-01 Operating model and staffing

MCF-OPS-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether operating model and staffing supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether operating model and staffing supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether operating model and staffing supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether operating model and staffing supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

OPS-02 Procedure and work control

MCF-OPS-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether procedure and work control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether procedure and work control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether procedure and work control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether procedure and work control supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

OPS-03 Maintenance and reliability

MCF-OPS-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether maintenance and reliability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether maintenance and reliability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether maintenance and reliability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether maintenance and reliability supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

OPS-04 Alarm, incident and problem management

MCF-OPS-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether alarm, incident and problem management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether alarm, incident and problem management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether alarm, incident and problem management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether alarm, incident and problem management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

OPS-05 Change and configuration management

MCF-OPS-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether change and configuration management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether change and configuration management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether change and configuration management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether change and configuration management supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

OPS-06 Capacity and service operations

MCF-OPS-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether capacity and service operations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether capacity and service operations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether capacity and service operations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

MCF-OPS-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether capacity and service operations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request procedures, work orders, alarms, incidents and changes; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-13; CG-14; obtain review and set reassessment trigger.

RES - Resilience, Continuity and Recovery

Primary gates: CG-09; CG-10. Baseline evidence: scenarios, continuity/recovery plans, exercises and retests.

RES-01 Resilience strategy

MCF-RES-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether resilience strategy supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether resilience strategy supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether resilience strategy supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether resilience strategy supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source,

	period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

RES-02 Fault-domain and containment design

MCF-RES-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether fault-domain and containment design supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether fault-domain and containment design supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether fault-domain and containment design supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether fault-domain and containment design supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

RES-03 Continuity planning

MCF-RES-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether continuity planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether continuity planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether continuity planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.

Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether continuity planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

RES-04 Recovery planning

MCF-RES-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether recovery planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether recovery planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether recovery planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether recovery planning supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

RES-05 Testing and exercising

MCF-RES-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether testing and exercising supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether testing and exercising supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether testing and exercising supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether testing and exercising supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

RES-06 Crisis and adaptive response

MCF-RES-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether crisis and adaptive response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether crisis and adaptive response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source,

	period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether crisis and adaptive response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

MCF-RES-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether crisis and adaptive response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request scenarios, continuity/recovery plans, exercises and retests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-09; CG-10; obtain review and set reassessment trigger.

SUP - Supply Chain, OEM and Ecosystem Assurance

Primary gates: CG-03; CG-13. Baseline evidence: due diligence, contracts, provenance, support and spares.

SUP-01 Supplier due diligence

MCF-SUP-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether supplier due diligence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether supplier due diligence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether supplier due diligence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether supplier due diligence supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SUP-02 Contract and service obligations

MCF-SUP-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether contract and service obligations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether contract and service obligations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether contract and service obligations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether contract and service obligations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SUP-03 Hardware and component provenance

MCF-SUP-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether hardware and component provenance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether hardware and component provenance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether hardware and component provenance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether hardware and component provenance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SUP-04 Software, firmware and update supply

MCF-SUP-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether software, firmware and update supply supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether software, firmware and update supply supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether software, firmware and update supply supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether software, firmware and update supply supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SUP-05 Spares, logistics and obsolescence

MCF-SUP-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether spares, logistics and obsolescence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether spares, logistics and obsolescence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether spares, logistics and obsolescence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether spares, logistics and obsolescence supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SUP-06 Remote support and third-party access

MCF-SUP-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether remote support and third-party access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether remote support and third-party access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether remote support and third-party access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

MCF-SUP-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether remote support and third-party access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request due diligence, contracts, provenance, support and spares; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-03; CG-13; obtain review and set reassessment trigger.

SEC - Digital, OT and Control-Plane Security

Primary gates: CG-07; CG-15. Baseline evidence: identity, privilege, configuration, logs and authorised tests.

SEC-01 Identity and privileged access

MCF-SEC-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether identity and privileged access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether identity and privileged access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether identity and privileged access supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether identity and privileged access supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

SEC-02 Control-plane protection

MCF-SEC-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether control-plane protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether control-plane protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether control-plane protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether control-plane protection supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

SEC-03 Network security and segmentation

MCF-SEC-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether network security and segmentation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether network security and segmentation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether network security and segmentation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether network security and segmentation supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

SEC-04 Configuration, vulnerability and patching

MCF-SEC-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether configuration, vulnerability and patching supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether configuration, vulnerability and patching supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether configuration, vulnerability and patching supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether configuration, vulnerability and patching supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

SEC-05 Detection and response

MCF-SEC-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether detection and response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether detection and response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether detection and response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether detection and response supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

SEC-06 AI-enabled and automated action

MCF-SEC-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether ai-enabled and automated action supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether ai-enabled and automated action supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether ai-enabled and automated action supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

MCF-SEC-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether ai-enabled and automated action supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request identity, privilege, configuration, logs and authorised tests; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-07; CG-15; obtain review and set reassessment trigger.

EVA - Evidence, Assessment and Assurance Management

Primary gates: CG-11; CG-12. Baseline evidence: manifests, workpapers, findings, gates and decisions.

EVA-01 Evidence architecture

MCF-EVA-001 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether evidence architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-002 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether evidence architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-003 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether evidence architecture supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-004 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether evidence architecture supports the Capability Instance and Service Outcomes.

Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

EVA-02 Evidence provenance and quality

MCF-EVA-005 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether evidence provenance and quality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-006 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether evidence provenance and quality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-007 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether evidence provenance and quality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.

Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-008 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether evidence provenance and quality supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

EVA-03 Assessment planning and execution

MCF-EVA-009 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether assessment planning and execution supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-010 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether assessment planning and execution supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-011 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether assessment planning and execution supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.

Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-012 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether assessment planning and execution supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

EVA-04 Findings, UNKNOWN and limitations

MCF-EVA-013 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether findings, unknown and limitations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-014 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether findings, unknown and limitations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-015 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether findings, unknown and limitations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-016 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether findings, unknown and limitations supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

EVA-05 Critical gates and decisions

MCF-EVA-017 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether critical gates and decisions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-018 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether critical gates and decisions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.

Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-019 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether critical gates and decisions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-020 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether critical gates and decisions supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

EVA-06 Reassessment and continuing assurance

MCF-EVA-021 - Design and governance

Define authority, scope, measurable acceptance criteria, dependencies, applicable states, evidence owner and trigger.

Element	Assessor procedure
Objective	Determine whether reassessment and continuing assurance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-022 - Implementation and configuration

Reconcile approved design to current implemented/as-built state, interfaces and controlled exceptions.

Element	Assessor procedure
Objective	Determine whether reassessment and continuing assurance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-023 - Operation and monitoring

Evaluate representative operations, monitoring health, exceptions, incidents, work and operator response.

Element	Assessor procedure
Objective	Determine whether reassessment and continuing assurance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

MCF-EVA-024 - Effectiveness, failure and recovery

Evaluate credible failure, safeguards, residual state, recovery and authorised validation evidence.

Element	Assessor procedure
Objective	Determine whether reassessment and continuing assurance supports the Capability Instance and Service Outcomes.
Scope	Record subject, owner, boundary, lifecycle, states, interfaces and providers.
Applicability	Justify Apply or approved N/A; missing evidence is UNKNOWN.
Evidence	Request manifests, workpapers, findings, gates and decisions; state claim, class, source, period, state and quality floor.
Method	Select authorised review, interview, inspection, analytics, sampling or test proportionate to consequence.
Design	Verify approved intent, criteria, architecture alignment and decision rights.
Implementation	Reconcile baseline, current state and deviations.
Operation	Examine representative records, monitoring, exceptions and incidents.
Failure/recovery	Trace dependencies, common mode, safeguard action, residual state and recovery.
Evidence assessment	Evaluate provenance, freshness, coverage, reliability, traceability, integrity and sufficiency.
Result	Record lens-specific result, confidence, finding, conflict and UNKNOWN.
Gate/review	Evaluate CG-11; CG-12; obtain review and set reassessment trigger.

Part III - Site-inspection checklists by domain

INS-GOV Governance, Accountability and Assurance Direction

Inspection focus: governance contacts; procedures; decision logs; exceptions; evidence access.

ID	Inspection action	Record
INS-GOV-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-GOV-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-GOV-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-GOV-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-GOV-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-GOV-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-CAP AI Capability, Service Outcome and Demand Management

Inspection focus: capability identity; installed capacity; operating state; demand constraints; owner.

ID	Inspection action	Record
INS-CAP-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-CAP-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-CAP-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-CAP-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-CAP-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-CAP-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-DEP Dependency, Concentration and External Reliance Management

Inspection focus: demarcations; shared routes; providers; common modes; alternatives.

ID	Inspection action	Record
INS-DEP-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-DEP-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-DEP-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-DEP-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-DEP-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-DEP-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-PHY Physical Site, Building and Security Infrastructure

Inspection focus: perimeter; structure; zoning; access; surveillance; custody; life safety.

ID	Inspection action	Record
INS-PHY-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-PHY-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-PHY-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-PHY-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-PHY-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-PHY-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-POW Electrical Power Infrastructure and Energy Continuity

Inspection focus: utility; generators; fuel; UPS; distribution; A/B separation; EPMS.

ID	Inspection action	Record
INS-POW-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-POW-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-POW-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-POW-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-POW-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-POW-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-THM Cooling, Thermal and Fluid Infrastructure

Inspection focus: plant; airflow; liquid loops; leak detection; water; BMS; recovery.

ID	Inspection action	Record
INS-THM-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-THM-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-THM-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-THM-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-THM-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-THM-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-ENV Environmental and Resource Performance

Inspection focus: sensors; meters; water; hazardous materials; waste; climate provisions.

ID	Inspection action	Record
INS-ENV-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-ENV-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-ENV-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-ENV-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-ENV-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-ENV-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-CMP AI Compute Infrastructure

Inspection focus: nodes; topology; density; firmware interfaces; health; recovery.

ID	Inspection action	Record
INS-CMP-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-CMP-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-CMP-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-CMP-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-CMP-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-CMP-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-STO AI Storage and Data Infrastructure

Inspection focus: tiers; fabrics; integrity; replication; checkpoint; restore; lifecycle.

ID	Inspection action	Record
INS-STO-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-STO-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-STO-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-STO-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-STO-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-STO-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-NET AI Network and Interconnect Architecture

Inspection focus: fabrics; cabling; optics; separation; congestion; OOB; spares.

ID	Inspection action	Record
INS-NET-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-NET-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-NET-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-NET-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-NET-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-NET-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-OPS Building Operations and Service Management

Inspection focus: staffing; work control; maintenance; alarms; incidents; changes; housekeeping.

ID	Inspection action	Record
INS-OPS-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-OPS-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-OPS-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-OPS-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-OPS-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-OPS-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-RES Resilience, Continuity and Recovery

Inspection focus: fault domains; containment; continuity; recovery; exercise; crisis fallback.

ID	Inspection action	Record
INS-RES-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-RES-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-RES-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-RES-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-RES-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-RES-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-SUP Supply Chain, OEM and Ecosystem Assurance

Inspection focus: supplier identity; provenance; update path; spares; remote support; exit.

ID	Inspection action	Record
INS-SUP-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-SUP-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-SUP-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-SUP-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-SUP-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-SUP-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-SEC Digital, OT and Control-Plane Security

Inspection focus: privileged access; consoles; segmentation; remote gateways; logs; automation.

ID	Inspection action	Record
INS-SEC-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-SEC-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-SEC-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-SEC-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-SEC-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-SEC-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

INS-EVA Evidence, Assessment and Assurance Management

Inspection focus: repositories; manifests; custody; findings; UNKNOWN; gates; supersession.

ID	Inspection action	Record
INS-EVA-01	Confirm induction, authorised route and stop authority.	Location; subject; state; observation; evidence; variance; action
INS-EVA-02	Identify subject, location, state and boundary.	Location; subject; state; observation; evidence; variance; action
INS-EVA-03	Reconcile sampled assets/zones to the approved record.	Location; subject; state; observation; evidence; variance; action
INS-EVA-04	Observe condition, labels, alarms, maintenance and temporary arrangements.	Location; subject; state; observation; evidence; variance; action
INS-EVA-05	Record inaccessible scope, deviation, evidence ID and follow-up.	Location; subject; state; observation; evidence; variance; action
INS-EVA-06	Do not operate equipment without explicit authority.	Location; subject; state; observation; evidence; variance; action

Part IV - Evidence collection playbooks linked to AIDCF-008

E1 Documentary E1 Documentary

Field	Requirement
Examples	policies, standards, procedures, drawings, contracts and inventories
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Authority, approval, version, scope, effective date and supersession.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Design/intent; not operation alone.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E2 Configuration E2 Configuration

Field	Requirement
Examples	settings, firmware, topology, manifests and access policy
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Authorised source, extraction method, subject, time, privilege and baseline.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Implementation/current state.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E3 Operational E3 Operational

Field	Requirement
Examples	telemetry, logs, alarms, work orders, incidents and observation
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Source health, clocks, period, gaps, filters and state coverage.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Operation under represented conditions.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E4 Test E4 Test

Field	Requirement
Examples	commissioning, functional, load, failover, recovery and exercises
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Authority, initial state, method, instrumentation, abort, result and restoration.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Effectiveness/resilience within test conditions.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E5 Independent E5 Independent

Field	Requirement
Examples	audit, specialist review, witness and provider assurance
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Issuer competence, independence, scope, method, exclusions and currency.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Corroboration; no inherited assurance.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E6 Human E6 Human

Field	Requirement
Examples	interview, walkthrough, demonstration and expert judgment
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Role, objective, responses, handling, corroboration and contradiction.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Context/practice; corroborate technical claims.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

E7 Derived E7 Derived

Field	Requirement
Examples	trends, models, query results and failure/dependency analysis
Evidence request	Assertion, subject, boundary, period, state, quality and sufficiency floor.
Collection	Sources, transformation, query/model version, assumptions and reviewer.
Metadata	Evidence ID, source, collector, custodian, classification, location, version, integrity.
Quality	Provenance, freshness, coverage, reliability, traceability and integrity.
Use boundary	Synthesis; cannot exceed source lineage.
Conflict	Retain supporting, challenging and qualifying links separately.
UNKNOWN	Create when mandatory type, source, integrity, coverage or method is unresolved.
Review	Collector, assessor, technical reviewer and acceptance state.

Part V - CG-01 to CG-15 gate evaluation workbooks

CG-01 Evaluation Workbook - Capability and outcome definition

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Capability and outcome definition
Mandatory evidence	capability, owner, outcomes, tolerances, criticality, architecture
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-02 Evaluation Workbook - Boundary and architecture integrity

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Boundary and architecture integrity
Mandatory evidence	approved boundary, current architecture, as-built reconciliation, exclusions
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-03 Evaluation Workbook - Critical dependency visibility

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Critical dependency visibility
Mandatory evidence	dependency graph, providers, routes, common modes, ownership
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-04 Evaluation Workbook - Life safety and hazardous energy

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Life safety and hazardous energy
Mandatory evidence	authorised safety/engineering records, inspections, permits, tests
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-05 Evaluation Workbook - Resilient electrical supply

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Resilient electrical supply
Mandatory evidence	SLD, studies, generation/UPS tests, fuel, maintenance, telemetry
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-06 Evaluation Workbook - Thermal continuity

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Thermal continuity
Mandatory evidence	thermal design, P&ID, telemetry, leak, failover and recovery tests
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-07 Evaluation Workbook - Critical control-system integrity

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Critical control-system integrity
Mandatory evidence	control architecture, configuration, authority, telemetry, fail-safe tests
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-08 Evaluation Workbook - Compute/storage/network functional integrity

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Compute/storage/network functional integrity
Mandatory evidence	topology, configuration, performance, health, error and recovery evidence
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-09 Evaluation Workbook - Failure containment

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Failure containment
Mandatory evidence	fault domains, isolation, common-mode scenarios and containment evidence
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-10 Evaluation Workbook - Recovery readiness

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Recovery readiness
Mandatory evidence	recovery plan, prerequisites, exercise, defects and retest
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-11 Evaluation Workbook - Evidence sufficiency

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Evidence sufficiency
Mandatory evidence	requirements, manifest, quality, sufficiency, conflicts and limitations
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-12 Evaluation Workbook - Critical UNKNOWN

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Critical UNKNOWN
Mandatory evidence	UNKNOWN record, consequence, evidence needed, owner and ceiling
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-13 Evaluation Workbook - Responsibility and authority

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Responsibility and authority
Mandatory evidence	RACI, delegations, clauses, escalation and decision rights
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-14 Evaluation Workbook - Change control

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Change control
Mandatory evidence	baseline, impact, change, test/rollback, approval and validation
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

CG-15 Evaluation Workbook - Integrated digital authority

Field	Required entry
Applicability	Capability, outcome, subject, boundary and rationale.
Criterion	Integrated digital authority
Mandatory evidence	identity, privilege, reachability, sessions, action limits and rollback
Evidence IDs	Supporting, challenging, qualifying, missing and restricted.
Quality/sufficiency	Dimension grades and package conclusion.
States/scenarios	Relevant normal, maintenance, degraded, emergency, recovery and transition.
Methods	Review, reconciliation, inspection, analysis, sampling or authorised test.
Findings/UNKNOWN	IDs, consequence, evidence needed and owner.
Status	PASS; FAIL; UNKNOWN; approved N/A.
Decision effect	Pass permits continued evaluation; Fail/critical UNKNOWN applies non-compensating ceiling.
Closure	Action, owner, evidence, retest and trigger.
Review	Technical and independent reviewer; snapshot/version.

Part VI - Sample completed assessments

EX-01 Synthetic AI training cluster - EX-01 Synthetic AI training cluster

Synthetic training example, not a real assessment.

Record	Completed entry
Charter	Defined synthetic Capability Instance, Service Outcomes, scope and decision question.
Evidence	Current architecture and telemetry support operation; representative storage/fabric recovery evidence is incomplete.
Control result	Design, implementation, operation and effectiveness stay separate.
Failure/dependency	Path, safeguards, residual state and recovery recorded.
Gate	CG-08 PASS within observed state; CG-10 UNKNOWN.
UNKNOWN	Subject, missing attribute, consequence, owner and evidence-to-resolve recorded.
Review	Independent challenge of evidence, gate logic and wording.
Decision	Limited/conditional wording only; request checkpoint/restore exercise.
Reassessment	Trigger and supersession path recorded.

EX-02 Synthetic power continuity - EX-02 Synthetic power continuity

Synthetic training example, not a real assessment.

Record	Completed entry
Charter	Defined synthetic Capability Instance, Service Outcomes, scope and decision question.
Evidence	Design, telemetry and maintenance are current; transfer tested only at partial load and fuel replenishment is unverified.
Control result	Design, implementation, operation and effectiveness stay separate.
Failure/dependency	Path, safeguards, residual state and recovery recorded.
Gate	CG-05 UNKNOWN; CG-03 UNKNOWN.
UNKNOWN	Subject, missing attribute, consequence, owner and evidence-to-resolve recorded.
Review	Independent challenge of evidence, gate logic and wording.
Decision	No resilience conclusion beyond tested load/duration; expand test and dependency evidence.
Reassessment	Trigger and supersession path recorded.

EX-03 Synthetic remote support authority - EX-03 Synthetic remote support authority

Synthetic training example, not a real assessment.

Record	Completed entry
Charter	Defined synthetic Capability Instance, Service Outcomes, scope and decision question.
Evidence	Identity and route evidence exist; permission scope and command limits are incomplete.
Control result	Design, implementation, operation and effectiveness stay separate.
Failure/dependency	Path, safeguards, residual state and recovery recorded.
Gate	CG-15 UNKNOWN; connectivity alone does not fail CG-06.
UNKNOWN	Subject, missing attribute, consequence, owner and evidence-to-resolve recorded.
Review	Independent challenge of evidence, gate logic and wording.
Decision	Candidate authority path; request permission export and authorised control test.
Reassessment	Trigger and supersession path recorded.

Part VII - Assessor competency and accreditation criteria

Level	Role	Minimum evidence
AC-0	Observer	Induction, confidentiality, safety and method orientation.
AC-1	Associate assessor	Supervised evidence intake and accepted workpapers.
AC-2	Domain assessor	Domain competence, witnessed fieldwork, evidence judgment and review.
AC-3	Lead assessor	Cross-domain scope, integration, gates, findings and decision drafting.
AC-4	Technical reviewer	Recognised technical authority and current review experience.
AC-5	Independent reviewer	Impartial senior assurance competence and gate/decision challenge.
AC-6	Decision authority	Governance appointment, independence and recorded delegation.

Competency portfolio

- AIDCF method and evidence discipline.
- Assurance, sampling, findings and bounded decisions.
- Applicable engineering/technical domains.
- Safety and authorised testing.
- Professional scepticism, impartiality and confidentiality.
- Graph lineage, candidate assertion and review-state handling.
- Witnessed assessments and accepted workpapers.
- Defined scope, methods, assurance levels and roles.
- Suspension and reinstatement criteria.

Part VIII - AITG graph-ingestion mappings

AIDCF record	Graph object	Minimum properties
Assessment	Assessment	ID; decision question; scope; version; status; owner
Capability Profile	CapabilityInstance	ID; outcomes; lifecycle; baseline
Service Outcome	ServiceOutcome	ID; tolerance; criticality; conditions
Control Result	ControlAssessment	control; subject; state; method; result; confidence; review
Evidence	EvidenceObject	ID; class; source; time; scope; integrity; status
Assertion	Assertion	ID; proposition; subject; conditions; candidate/reviewed state
Finding	Finding	ID; criterion; condition; cause; consequence; status
UNKNOWN	UnknownRecord	ID; subject; missing attribute; reason; consequence; ceiling
Scenario	FailureScenario	ID; state; event; path; safeguards; residual; recovery
Gate	GateResult	ID; applicability; evidence; status; decision effect; review
Decision	AssuranceDecision	ID; subject; scope; status; conditions; validity; authority
Review	ReviewRecord	ID; reviewer; independence; comments; disposition

Relationships

Relationship	Use
ASSESSES	Assessment to capability/control
SUPPORTS / CHALLENGES / QUALIFIES	Evidence to assertion
EVALUATES	Control assessment to control or safeguard
AFFECTS	Finding/scenario to outcome
DEPENDS_ON	Capability/function to entity/provider
PROPAGATES_TO	Failure-path step to next step
PROTECTED_BY	Function/outcome to safeguard
EVIDENCES_GATE	Evidence package to gate
LIMITS	UNKNOWN/limitation to assertion/decision
REVIEWED_BY	Object to review record
GENERATED_FROM	Derived object to sources
SUPERSEDES	New version to prior version
INTEGRATION_HANDOFF	AITG-native to AIDCF-native object

Ingestion validation rules

- Every object has stable ID, source, version and state.
- Every assertion has evidence, challenge/qualification or UNKNOWN.
- Every derived object retains source and transformation.
- Every gate retains mandatory evidence and review.
- Candidate inference cannot become reviewed fact automatically.
- Connectivity does not imply reachability, authority, causality or realised effect.
- AIDCF and AITG decisions remain separate.
- Sensitive paths use classification and controlled query policy.
- Supersession preserves prior snapshots and lineage.

Part IX - Enhanced workpaper schemas

Control Procedure

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Decision Tree Instance

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Inspection Record

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Evidence Collection

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Gate Workbook

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Competence Record

Mandatory field	Entry
stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Graph Ingestion Manifest

Mandatory field	Entry

stableId	
assessmentId	
capability/outcome	
subject/boundary/state	
criterion/decision question	
method	
evidence references	
quality/sufficiency	
result/status	
UNKNOWN/conflicts	
gate/decision effect	
owner/preparer	
reviewer	
version/date/trigger	

Appendix A - Enhanced conformance

ID	Validation
AM11-VAL-01	Every applicable control has an individual procedure record.
AM11-VAL-02	Every used decision tree retains the selected branch and rationale.
AM11-VAL-03	Every inspection records inaccessible scope and safety status.
AM11-VAL-04	Every Evidence Object follows an applicable collection playbook.
AM11-VAL-05	Every applicable critical gate has a completed workbook and independent review.
AM11-VAL-06	Synthetic examples remain segregated from real assessments.
AM11-VAL-07	Every assessor role has an engagement-specific competence decision.
AM11-VAL-08	Every graph object preserves source, version and review state.
AM11-VAL-09	No graph inference automatically changes a gate or decision.
AM11-VAL-10	UNKNOWN, conflict, safety and non-compensation remain visible.

Release review

Reviewer	Status
Lead assessor peer	Pending
Electrical SME	Pending
Mechanical SME	Pending
Compute/HPC SME	Pending
Storage/network SME	Pending
Operations/reliability SME	Pending
OT/security SME	Pending
Evidence specialist	Pending
Safety/legal/privacy	Pending
AITG/graph reviewer	Pending
Independent practitioner pilot	Pending
Public release	Pending

Final doctrine: additional procedural detail improves execution but cannot create authority, evidence, competence or certainty. Where the chain is incomplete, AIDCF reduces, conditions, suspends or withholds assurance.
