How to use this record

- One record per pilot, completed at SG7 (or at an early stop) by the lead assessor and the research lead, and signed off by the sponsor and the decision authority.

- The full record is **Confidential**. A public version is produced only under AIDCF-PIL-002 §12: identifying fields are redacted to the agreed level, but redaction never removes the decision state, controlling Gate Results, US4/US5 UNKNOWN Records or material limitations (RAS-REQ-012).
- Every figure is a measured value from the pilot's own records. Planning assumptions from AIDCF-PIL-001 §8.2 appear only in §11, labelled as such.
- The decision content (§7) is copied from the approved decision record (WP-19) and the AIDCF-012 reports; it is not re-derived here (AMH-REQ-044).

9. Decision usefulness (PM-18)

Completed by each named decision user after receiving the reports, before seeing the research analysis. Rating: 1 strongly disagree, 2 disagree, 3 neither, 4 agree, 5 strongly agree, or "cannot say".

Statement	Rating	Reason
U1 The output answered the decision question I set, within the limits stated.		
U2 I could see why the decision state was what it was (gates, UNKNOWNs, limitations).		
U3 The output told me what I would need to do or obtain to reach a stronger conclusion.		
U4 The output told me something material I did not already know.		
U5 I would rely on this output, within its stated scope, for the decision named.		
U6 Compared with the reviews I normally receive for this infrastructure, this output was [more / equally / less] useful, because:	n/a	

These statements are a structured prompt for one user's view; they are not a validated instrument and are not aggregated into a score.
